## Sustainability at UnitedHealth Group

---

Sustainability is an integral part of our business strategy, culture and mission as we work to help ensure the health care system works better for everyone in the near and long term.

- **Helping to Build a Modern, High-Performing Health System.** We are committed to a future that expands access to care, improves health care affordability, enhances the health care experience and achieves better health outcomes. Partnering with key stakeholders, we are advancing health equity, building healthier communities and supporting the ongoing response efforts to COVID-19.
- **Responsible Business Practices.** For more than 40 years we've developed strong and effective governance practices through compliance, board diversity and independence,

a commitment to ethics and integrity, and an emphasis on data security and supply chain management.

- **Our People and Culture.** We celebrate our people, ideas and experiences, creating a culture where all team members are appreciated, valued and able to reach their full potential. We join together as individuals — forming a team as diverse as the people we serve — in meeting our responsibility to improve the health system.
- **Environmental Health.** We recognize the important role the environment plays in the health of every community and we are committed to mitigating our impact on the environment.
